

# CARPET SUBFLOOR MEMBRANE INSTALLATION

**1**  
Unroll membrane and cut to fit. Flip membrane over, butt edges together and tape the seams.

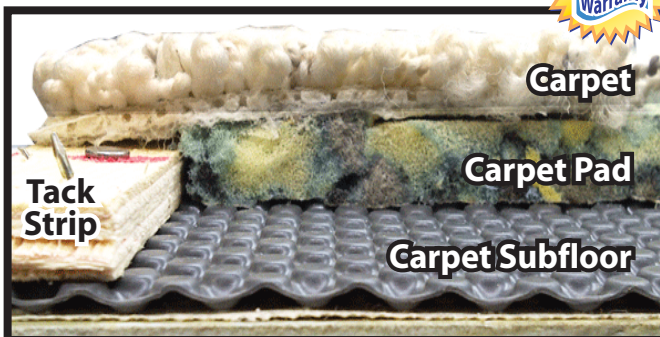

**2**  
Nail tack strip through the membrane.

**3**  
Install pad & carpet.

This brochure is only a guide and is not intended to be an installation instruction. For detailed instructions refer to roll label or go to [www.superseal.ca](http://www.superseal.ca)

## PRODUCT BENEFITS

**SUPERSEAL Carpet Subfloor** has a unique double dimple design with dimples on the top and the bottom of the membrane providing 2 air spaces. These 2 air spaces allow the floor base and carpet pad to breathe independently. Keeping moisture out significantly increases the life of the carpet pad and carpet.

- ✓ Keeps moisture out, top & bottom
- ✓ No need for a plywood subfloor
- ✓ Easy tack strip installation
- ✓ Furniture legs will not damage it
- ✓ High quality, low cost alternative
- ✓ Quick & easy to install

	(7.2cm x 41.5m)

### Proudly Offered By

# SUPERSEAL<sup>TM</sup> Carpet Subfloor

No Plywood, No Nails, No Glue

## DOUBLE DIMPLED CARPET SUBFLOOR MEMBRANE

Brochure Part # BRDD111

## PRODUCT BENEFITS

### ✓ Double Dimple Design

The unique double dimple design allows both the substrate and the flooring to breathe. This provides air flow under & above the membrane, substantially extending the life of the pad and carpet.

### ✓ Installed Tack Strips Stay Dry

**SUPERSEAL** Carpet Subfloor allows the tack strips to be nailed through the membrane. This keeps them dry and away from substrate moisture & rot.

### ✓ Easy Installation

**SUPERSEAL** Carpet Subfloor is quick and easy to install. The entire system consists of the membrane and **SUPERSEAL** Subfloor tape.

### ✓ Economically Priced

**SUPERSEAL** Carpet Subfloor is a high performance, low cost subfloor membrane. It saves money by eliminating the need for plywood systems.

### ✓ Permanent Moisture Barrier

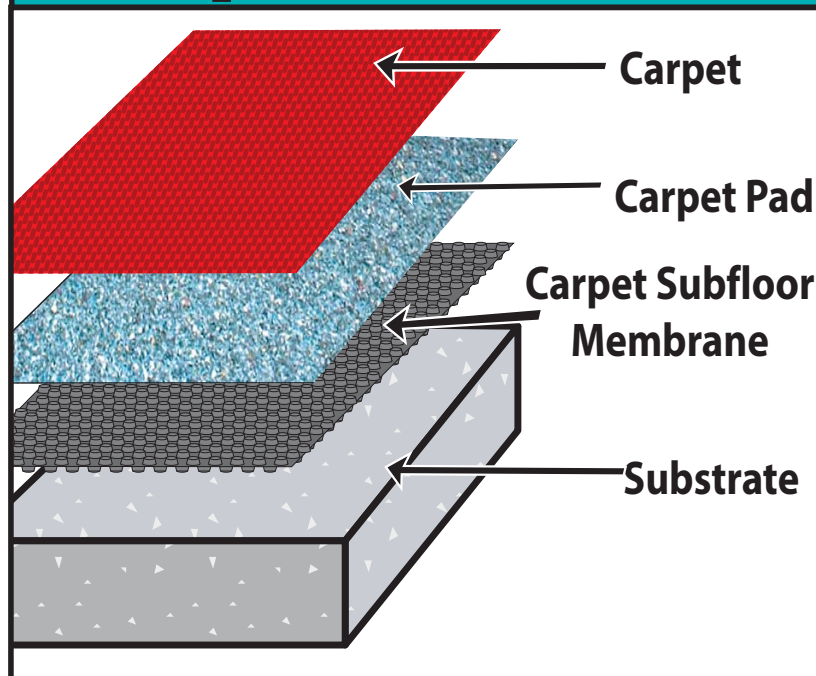

Made from tough long lasting plastic, **SUPERSEAL** Carpet Subfloor stops substrate moisture from absorbing into underlay, carpet and wood.

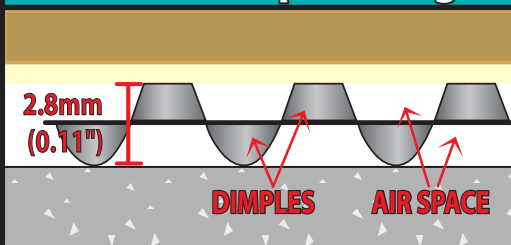

## SUPERSEAL CARPET SUBFLOOR MEMBRANE

Moisture will always find a way through cracks or voids and into your home. When carpet gets wet and does not have proper protection or ventilation, the trapped moisture can damage your flooring attracting mold and mildew and creating expensive repairs. **SUPERSEAL** Carpet Subfloor provides full surface ventilation and maximum protection for your new floor.

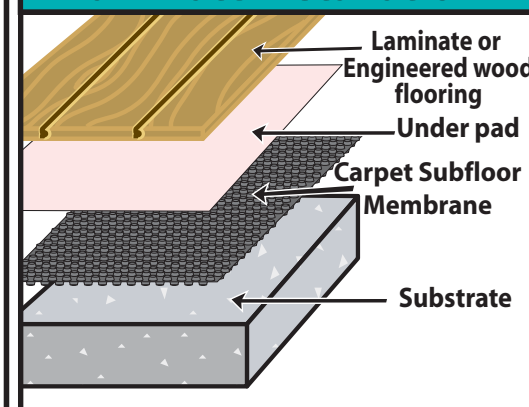

## Carpet Installation

## Double Dimple Design

## Laminate Installation

Not intended for load bearing walls.
